from exam to procedure

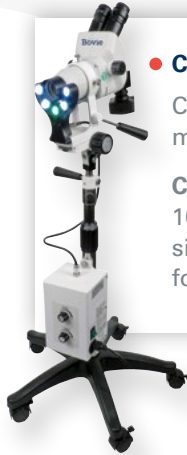

The Next Generation of Clarity and Comfort in Colposcopy Exams

The Colpo-Master™ line offers superior sharp 3-D imaging with excellent clarity. Designed for maximum efficiency from exam to procedure, this suite of colposcopes features optimized ergonomics and a broad range of magnification.

• Colpo-Master I

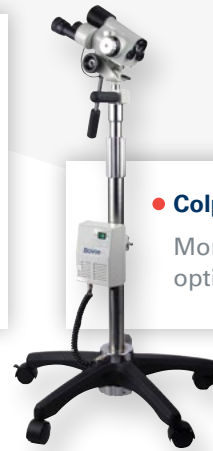

Easy access to surgical site through swing-arm suspension design

• Colpo-Master II

Compact center-post mount-style for exams

Colpo-Master I and II have 10x more magnification than similar colposcopes allowing for enhanced visuals.

• Colpo-Master III

More economical option for exams

Colpo-Master I Zoom Suspension Arm Colposcopes & Colpo-Master II Center-Post Mount Colposcopes

- 3-D imaging
- Zoom magnification range 4-27x with 20x eyepiece
- S-video and digital camera options available for connecting EMR platforms or monitor displays (trinocular head required)
- Dual light-intensity controls (green and white) for increased visibility of tissue variances
- Field of view ranges from 58.5mm at 4x to 8.5mm at 27x
- Binocular or camera-ready trinocular heads with 298mm working distance
- Independently adjust focus with dual diopter to eliminate eye strain

Colpo-Master III Triple Magnification Colposcopes

Capitalize on the versatility of a center-post-style design with 3-point magnification and semiautomatic focus.

- 3-D imaging
- Three magnification settings: 3.75x, 7.5x, and 15x
- Adjust magnification and maintain focus through knob rotation
- Flip-down green filter built into head of unit
- Lightweight and easy to maneuver
- Dual diopter, independent, eye-focusing controls
- 300mm working distance

Procedure Safety and Reliability Your Practice Demands

Integrate the Bovie® Specialist | PRO system with smoke evacuation to perform procedures like LLETZ/LEEP, wart removal, and other gynecologic procedures allowing additional revenue streams by treating patients in-office.

Specialist | PRO Electrosurgical Generator

Provide OR-level technology to your patients in your office with this easy-to-use energy-based unit.

- Five modalities with up to 120 watts of power for a variety of tissue effects
- Monopolar and bipolar capabilities
- Compatible with most industry-standard accessories
- Opportunity for additional revenue streams
- 4-year warranty

Smoke Shark™ II Smoke Evacuator

Protect yourself, your staff, and patients from airborne pathogens and contaminants. Effectively removes hazardous smoke and particles from the operative site reducing the risk of surgical site infection (SSI).

- 35-hour, long-life filter can reduce procedure costs by over 30%*
- Improves visibility of operative site
- Immediate evacuation of contaminated smoke particles
- Operates in conjunction with optional Bovie Remote Activation Switch for maximum filter life and surgical efficiencies
- Compatible with most energy-based generators

Disposable LLETZ/LEEP Loop

Achieve precise control during biopsies and other excisional procedures.

- 100% safety-tested insulation
- Molded, ribbed safety grip
- 21 sizes available

Disposable Ball Electrodes

Designed to control bleeding, fulgurate, and treat diseased tissue safely and efficiently.

- Safety grip insulators
- Available in 5mm and 3mm balls
- Manufactured to the highest standards

Bovie Specialist | PRO-G

Combination of Bovie Specialist | PRO package with our superb Smoke Shark II system and mobile stand technology to produce a compact, mobile system for the office or specialty facility.

- 120 watts

Imagine working with more comfort, precision, confidence, and safety.

Visit BovieMedical.com for more information on Bovie's suite of women's health products.

MI-550

MI-750

MI 550 LED & MI 750 Exam, Diagnostic & Procedure Lighting

MI lighting delivers maximum brightness, shadow control, sharpness, color accuracy and affordability. Each lighting choice emits low heat and is engineered with "Green" Technology using less electricity vs standard halogen lights and provides over 50,000 hours of usage eliminating the need for inconvenient bulb changes. Sterilizable handle lets you easily control brightness and position with one hand while staying within the sterile field. Each lighting choice allows you to design your lighting with flexibility and ease.

MI-550 • 55,000 lux at 24" (60cm) • 4,300° K pure white • CRI 97

MI-750 • 75,000 lux at 39.4" (1m) • 4,300° K pure white • CRI 97

AcuDop™ II Doppler System

Doppler system provides Unmatched Digital sound quality along with Breakthrough XD probe technology that provides up to a 56% increased sensitivity at shallow depths. Models available in Displayed, Non-Displayed and Rechargeable options.

- Unmatched Digital Sound Quality
- Interchangeable OB & Vascular Probes
- Breakthrough XD probes provide up to 56% increased sensitivity at shallow depths (2-5cm)
- Cost saving rechargeable models
- Sized to fit comfortably in your hand and pocket
- Only 5 year Warranty available on ALL Labor & ALL Parts

Freezpoint™

Bovie® Freezpoint is a safer, easier, and colder device, that delivers an improved, low cost per procedure, cryosurgical option. The Freezpoint device is 27%–62% colder than common multi-use disposable systems.

- **CRY8** – 8 gram device
- **CRY16** – 16 gram device
- **CRY16-2** – 16 gram device (2 pack)

105 – ClearSpec LED Speculum Illuminator

ClearSpec® Speculum

The ClearSpec Speculum is the only speculum clinically proven to provide complete visualization of the cervix in 3 times as many patients.¹

- May help to improve the diagnosis by providing a more complete view of the cervix
- Improves workflow while decreasing procedure time and patient discomfort due to less need for speculum repositioning
- Reusable LED illuminator with 2-hours of light with an auto on/off option
- Illuminator conveniently fits into speculum handle providing light source with no cords or recharging batteries
- LED Illuminator is less expensive than traditional rechargeable lights that can accidentally be thrown away

1. Hill et al., Sheathed versus standard speculum for visualization of the cervix. IJGO. 2014; 125:116-120

In this study the investigators were able to visualize the entire cervix in 42 (61.8%) patients when using the sheathed speculum [ClearSpec] compared with 11 (16.4%) patients undergoing standard speculum examination (p<0.0001).

Most Common OBGYN Procedure CPT Codes

CPT Code	Procedure	Physician's National Fee Schedule 2017
56605	Biopsy of vulva or perineum (separate procedure), one lesion	\$83.98
56820	Colposcopy of the vulva	\$114.84
56821	Colposcopy of the vulva with biopsy(s)	\$151.09
57420	Colposcopy of the entire vagina, with cervix, if present	\$120.59
57421	Colposcopy of the entire vagina, with biopsy(s)	\$160.78
57452	Colposcopy of the cervix including upper/adjacent vagina	\$111.25
57454	Colposcopy of the cervix with biopsy(s) of the cervix and endocervical curettage	\$155.76
57455	Colposcopy of the cervix with biopsy(s) of the cervix	\$145.35
57456	Colposcopy of the cervix with endocervical curettage	\$137.09
57460	Colposcopy of the cervix with loop electrode biopsy(s) of the cervix	\$287.11
57461	Colposcopy of the cervix with loop electrode conization of the cervix	\$325.15
57500	Biopsy, single or multiple, or local excision of lesion with or without fulguration (separate procedure)	\$129.92
57505	Endocervical curettage (not done as part of dilation and curettage)	\$104.08
58110	Endometrial sampling (biopsy) performed in conjunction with colposcopy (List separately in addition to code for procedure)	\$48.81
99170	Anogenital examination with colposcopic magnification in childhood for suspected trauma	\$167.60
